SUMMARY

Mern Stack Developer with 1 year of experience in building scalable Mern-stack applications using MERN. Developed projects like a real-time mentorship platform, secure LMS. Skilled in RESTful API payment gateways, and real-time features. Passionate about solving complex problems and delivering innovative, user-focused solutions.

EXPERIENCE

Mern Stack Developer

Jan '25 — Present

NextHome

Lahore, Pakistan (Remote)

- Developed responsive UI components in React for a real estate booking management platform used by ASSANHOME.
- Collaborated with a team of four developers to implement features for managing real estate bookings efficiently.
- In my e-shop project, have I built the UI using React, and on the server side, have I used Redux with JavaScript? Also, for payment methods, have I used cash, PayPal, or Stripe.
- In my LMS project, have I built the UI using Next.js with shadcn. On the server side, have I used Redux Toolkit Query and TypeScript. For user creation, have I implemented token-based verification, and for login, have I used Google or GitHub authentication.

PROJECTS

LEARNING-MANAGEMENT-SYSTEM [Link](#)

- Developed a comprehensive lms using Next.js and typescript.
- Use Next.js with Shadcn for building UI and make it Responsive for all screen.
- Is my server-side project built using TypeScript or the Redux RTK (Redux Toolkit).
- Does my project include Google or GitHub authentication for user login? Alternatively, have I implemented a system where a token is sent during user creation, verified to complete the user creation process, and an OTP is sent when an authenticated user logs in.
- In my project, I have sold courses to users, and these courses are paid. After purchasing a course, users can send messages or reviews to the admin. I have used Stripe for course purchases, which supports payments via card, cash, PayPal, and other methods. In this project, the admin creates courses and adds videos, and I have added some courses. The admin can also check user analytics, course analytics, and order analytics.

E-COMMERCE [Link](#)

- Developed an e-commerce website using React.
- Implemented selling and buying features for sell and buy product using mern stack.
- Use google console developer for authentication with google.
- Enhance code reusability by sharing common functionality across multiple Express servers through a custom NPM package.
- In my project, have I used a Stripe key, and are the payment methods PayPal, cash, and others? Also, have I used Redux or JavaScript on the server side, and for user creation, have I implemented a token-based verification system where a token is sent and verified before a user is created.

Mobile-Movie-App [Link](#)

- This project has been implemented using React Native.
- In my project, have I added top-rated movies, and can we search for and watch any movie.
- This app will be used for watching movies, and whenever a new movie is added, it will be shown at the top.

UP-INVEST [Link](#)

- Developed Full Stack Up Invest site as well as mobile application using React Native for stock market.
- Implemented OAuth base authentication and GraphQL API with typescript.
- Leveraged RTK Query to efficiently manage API integrations, reducing boilerplate code and ensuring seamless data fetching, caching, and synchronization across the application.

SKILLS

Programming Languages C++, TypeScript, JavaScript

Frontend Development Html, CSS, ReactJs, Redux, Redux Toolkit, Bootstrap, Next.js, Shadcn, Zustand, Context API

Backend Development NodeJs, ExpressJs, JWT, OAuth, Autherization, Authentication, Nest.js

Database Technologies MongoDB, SQL, MySQL, PostgreSQL, Prisma

EDUCATION

BSCS Virtual University
